Health Advocate Set Up Area

# Drive Up Event: 3 Steps

# 📍 Step #1: Check in process

## FLU SHOT PARKING SPACES

Check in person will be using a tablet to confirm appointment and check in. They will also have a print out of appointments as back up.

Health Advocate check in person will be the first person cars will pull up to. The check in person will ask for full name of employee, spouse, or domestic partner. Health Advocate will check tablet or paper appointment print out to confirm appointment, and consent. If spouse/domestic partner is in car consent will be handed to Health Advocate, if the consent is not signed, car will be directed to move to the next available parking spot to fill out consent while employee receives shot. Thus keeping the flow of traffic moving.

Signs will be placed at entrance of one way traffic where cars will pull up to check in.

## 📍 Step #2: Flu shot administration

### Health Advocate Set Up Area

#### Supplies under staging area:

- Vaccine supplies
- Refrigerator or cooler
- Sharps containers or they can be by table in the empty space
- Tablets
- Paper consents
- Schedules
- Tables (high tops in empty spaces)
- Chairs

Flu shot will be given on the arm closest to driver/passenger side window. If participants do not have proper clothing mobile privacy screen will be brought over to allow for shot to be given in privacy.

**EMPTY SPACE**

Sharps containers can be at the table or rolling cart next to parking space

Health Advocate nurse will approach car once pulled into open parking spot ready to provide shot. Nurse will have alcohol swab, flu shot (pre filled syringe), and band aid. Once driver side completes flu shot nurse will go to the passenger side to collect consent, and provide shot. Reason driver side is taken first is to give time for passenger to complete consent if necessary.

After check in and confirmation of appointment, check in staff will directly member(s) to the next open parking spot. Spots will be taken from the furthest parking spot first to ensure the best flow of traffic.

**EMPTY SPACE**

## Step #3: Exit & Clean Up

All hazardous material will be disposed of offsite, and any Health Advocate owned supplies will be taken off site. If a tent was rented, rental company will be in charge of breakdown, Health Advocate will communicate with site when tent will be taken away.

### Health Advocate Set Up Area

**EMPTY SPACE**

Health Advocate nursing staff will assist in back out of stop and participant will pull out in a one way direction.

Once flu shot is administered participant will be given record of flu shot, and syringes will be discarded in the sharps containers.

Health Advocate nursing staff will assist in back out of stop and participant will pull out in a one way direction.

**EMPTY SPACE**
